

THE AURA™ BREATHER VENT

Our little sucker will dissipate the moisture under the roof membrane

- All aluminum construction
- Easy to install with pre-drilled holes in flange
- The Aura design stops entry of wind-blown rain and snow
- Recommended spacing: 1 per 1,000 square feet
- One-way damper prevents moisture from re-entering
- Our Aura Breather Vent can out-perform any type of gravity or breather vent on the market today. Our one vent will do it all.
