AV-72	72	81	23	82R*	2/12	29	55	4,069	28.25	16,950

* Note: The Aura Ventilator can be installed on steeper pitch roofs, up to 90 degrees. A modification is available at no extra charge. The stock version of the AV cannot remain rain resistant above the roof pitch listed above for that model.

R*: Available in Round Flange only

¹To install the Aura Ventilator on steeper pitches up to a 90 degree angle, a modification is available.

²With equal soffit, gable or other inlet vents, 'Pop Vents' (inlet vents) are available.

³This chart is based upon the 1/300 rule. One square foot of ventilation on top for every 600 square feet of floor. 50% exhaust, 50% intake.
