

Installation Instructions for GZL-3-SM-rib

" A low-profile roof jack vent for R-Panel metal roofs such as SM-Rib, Tuff-Rib, Panel-Loc Plus, Master Rib & Ag Panels."

**fits pitches 2/12 and up, features a built-in damper and an easy-to-clean, removable stainless-steel screen*

Step 1:

Turn the roof jack upside down and make a cardboard template of the flange. The template should be 7" wide and 8" long with a 3 1/4" hole in the middle.

Step 2:

Using the template trace the hole and outline onto the roof panel centered in between the ribs. The roof jack vent should be installed no more than 4ft from ridge cap.

Step 3:

Using nibbler, snips or hole saw cut 3.25" hole in roof panel and remove all debris.

Step 4:

Place 3/4" butyl tape on all four sides of the flange. The tape should overlap at each corner.

**fits pitches 2/12 and up, features a built-in damper and an easy-to-clean, removable stainless-steel screen*

Step 5:

Pull up the duct through the hole and insert the bottom of the tail pipe into the flex duct then secure with a zip-tie or clamp. Install roof jack vent so that the flange aligns with template marks.

Step 6:

Use #10 self tapping screws with rubberized washers to secure the flange to the roof following the pattern shown in **Step 7**.

Step 7:

Install screws as shown below. Qty 8

Step 8:

This is how the Gendzl Gooseneck Roof Jack Vent should look when installed.
