

TPO Clad Steel Pitch Pan - Pitch Pocket for TPO Roofs

Model: PP-TPO-6x6-H5

Pitch Pocket with a 6" x 6" ID by 5" Tall

- A roof flashing used on membrane roofs to make roof penetrations waterproof.
- Constructed of strong 25 guage galvanized steel.
- TPO coating is .025" thick.
- Clad TPO steel offers superior adherence to TPO membranes.
- Clad metal saves the roofer time by eliminating the need to prep bare metal.
- Adheres to both TPO wraps and flashings for water-tight installations.
- Multiple sizes available to fit a variety of pipe, HVAC, and conduit penetrations.
