

Tail Pipe Installation with Roof Vent

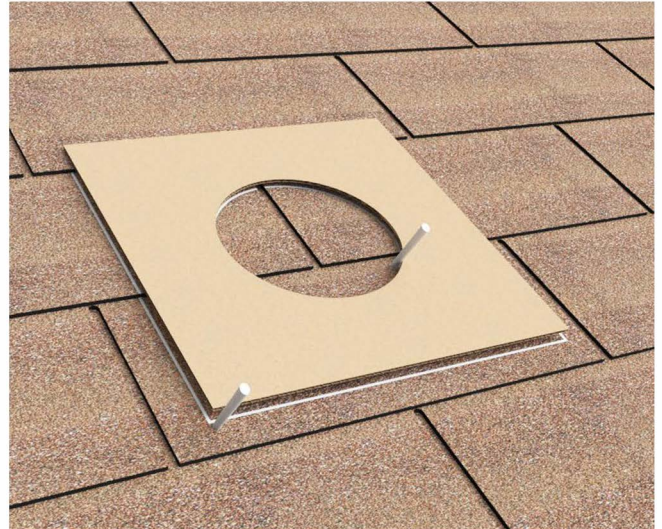

Step 1:

Turn the vent upside down and make a cardboard template from the flange. The template should be the same size as the flange with the hole in the middle.

Step 2:

Using the template, trace the square and circle onto the roof as shown.

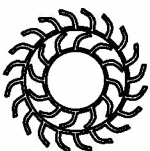

Step 3:

Remove cardboard template to show the square and circle pattern.

Step 4:

Using a reciprocating saw cut out a hole in the roof deck and remove all debris.

Tail Pipe Installation with Roof Vent

Step 5:

Once the hole is cut reach in the attic and pull up the duct through the hole.

Step 6:

Insert the bottom of the Tail Pipe to the flex duct.

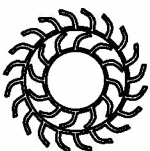

Step 7:

Using a Zip Tie secure the Flex Duct to the Tail Pipe.

Step 8:

Put roofing sealant on the underside along the bottom edge of flange as shown

Tail Pipe Installation with Roof Vent

Step 9:

Push Flex Duct back into attic, then lift shingles to insert flange underneath.

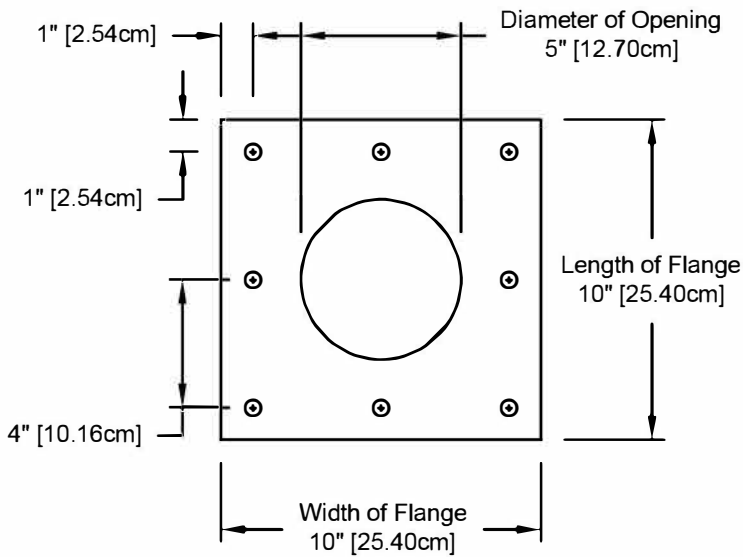

Step 10:

With the vent in place secure the flange to the shingle roof using a screw gun or drill

10A:

Required screw: #10 x 1.5" steel sheet metal screw
Total number of screws required = 8

Step 11:

This is how the Round Back Vent should look when finished.
