

# THE AURA™ BREATHER VENT

*Removes moisture from under the roof membrane*

ABV-6-D

One-way damper with mylar flap

- Protects the roof more effectively than other leading breather vents because it removes water vapor before it condenses to liquid water
- Optional one-way damper prevents moisture from re-entering
- The Aura louver technology prevents rain or snow entry
- Easy to install
- Recommended 1 vent per 1,000 square feet
- All-aluminum construction

Removable Head for Easy Installation
